EDUCATION

B. Sc. Software Engineering and Mathematics Minor | McGill University September 2022 - May 2026
Coursework: Parallel Computing, Concurrent Programming, Compiler Design, Database Systems, Operating System, Algorithms and Data Structures, Software Design, Software Validation

EXPERIENCE

Front-End Developer | MamaGoose Charity Foundation July 2026 - Present

React, Figma, CSS, Typescript, Tailwind

- Designed and built the organization's website end-to-end, from Figma mockups to React implementation
- Architected a design library and implemented 10+ generic components with TypeScript and Tailwind CSS, forming the foundation of a design system which enhanced UI development time
- Architected a language theme system supporting English, French and Chinese (Simplified) using i18next, enhancing accessibility by twofold

Software Developer Intern | BorderXLab May 2024 - September 2024

Revamped the push notification management system, enhancing the entire lifecycle from generation and scheduling to tracking and optimization.

Java, Berkeley DB, PostgreSQL, Python, MongoDB, RedisDB

- Migrated database from embedded to out-of-process, reducing the boot time by 20 minutes
- Automated the extraction and processing of financial data from RedisDB, webpages, and APIs, storing it in MongoDB, producing reliable reports for financial tracking
- Built an automated pipeline to extract and structure web data, accelerating page integration by 90% with no loss in data fidelity
- Analyzed and troubleshoot data quality issues, improving overall data accuracy by 20%

PROJECTS & LEADERSHIP

BOLT Case Competition | 1st Place Winner

February 2026

Node.js, Copilot, React Native

- Won 1st place in a case competition with 70+ competitors
- Conceptualized one of two key features, contributed to prototyping and MVP iterations, and delivered a high-impact presentation as the final pitch for a social payment app.
- Developed a strategy modeled to drive 190% user growth based on case data over 6 months

AI Mars Rover Simulator

January 2025 - April 2025

Python

- Developed a custom user interface library for Pygame, streamlining the creation of interactive GUI elements
- Parsed and processed raw map elevation data into a topographic map for GUI elements and path finding training

SKILLS

Technologies: Java, Python, C, C++, SQL, JavaScript, TypeScript, CSS, HTML, Node, SQL, Bash, Linux, GdScript, Git, Apache Kafka, Metabase, JUnit, Agile

Languages: English (Fluent), French (Fluent), Chinese (Fluent)
